

ALAN RICKY MARTIN

Full Stack Developer (MERN)

Chennai, India | alanrickymartin.f@gmail.com | +91 8939484896 | github.com/alanrickymartin |
linkedin.com/in/alanrickymartin

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building MERN stack applications. Background in operations management provided first-hand exposure to real-world business problems, directly motivating the development of production-ready tools to solve them. Certified in IBM Applied AI and Google UX Design, combining technical skills with strong user-focused thinking. Seeking a junior developer role to grow and contribute to meaningful products.

TECHNICAL SKILLS

Frontend:	HTML5, CSS3 (Flexbox, Grid), JavaScript (ES6+), React.js (Hooks, Context API)
Backend:	Node.js, Express.js (REST APIs, Middleware)
Database:	MongoDB (CRUD, Indexes, Mongoose)
Security:	bcrypt Password Hashing, JWT Authentication & Authorization, Protected Routes
Tools:	Git & GitHub, Figma, VS Code
Familiar With:	Python, UI/UX Testing

EXPERIENCE

Operations & Hiring Manager

Aug 2023 – Aug 2024

DCC Paints, Chennai

- Managed records and payroll data for 50+ employees — identified manual inefficiencies that directly inspired building a full-stack User Management System.
- Recruited and onboarded site engineers; coordinated cross-functional teams across multiple project sites.
- Conducted client and internal meetings, improving communication workflows and operational reporting.

UI Testing Intern

Nov 2023 – Feb 2024

Across The Globe (Remote)

- Performed UI testing on live client applications, validating functionality, layouts, and responsiveness across devices.
- Identified, documented, and reported bugs; re-tested fixes and maintained issue tracking logs.
- Collaborated with the development team on daily testing cycles, contributing to faster bug resolution.

PROJECTS

User Management System

github.com/alanrickymartin/user-mgmt

React.js · Node.js · Express.js · MongoDB · bcrypt · JWT

- Built a full-stack internal tool to manage employee records, payroll data, and user access — directly solving operational inefficiencies observed in a real workplace.
- Implemented secure authentication using bcrypt password hashing, JWT tokens, role-based authorization, and protected API routes.
- Designed responsive React UI with role-specific dashboards; backend built with Express.js REST APIs connected to MongoDB.

EDUCATION

B.E. Robotics and Automation

Kings Engineering College | 2023 · CGPA: 7.7/10

CERTIFICATIONS

- IBM Applied AI Professional Certificate — Coursera
- Google UX Design Professional Certificate — Coursera
